Protects driver and passengers by absorbing the force of impact in the event of a collision.

NCAP FIVE-STAR: Applicable for Triton Athlete and Adventure variants only.

ACTIVE STABILITY & TRACTION CONTROL (ASTC)**

ASC recognises over-steer or under-steer and applies brake-force to maintain control, while TC helps to maintain traction on slippery surfaces.

ABS lets you maneuver under extreme braking while EBD distributes brake-force between the front and rear wheels, to assist the car in stopping within a shorter distance.

SEAT BELTS WITH DOUBLE PRETENSIONERS* AND FORCE LIMITERS

Pretensioners restrain the driver and front passenger firmly in their seats during airbags' deployment, minimising crash force in the event of a collision.

RISE BODY

The Reinforced Impact Safety Evolution (RISE) body consists of crumple zones and reinforced support to absorb and dissipate the collision impact force.
